

## Task 5: Malware Types & Behavior Analysis – Checklist

- 1 Studied common malware types (virus, worm, trojan, ransomware)
- 2 Reviewed known malware hashes using VirusTotal
- 3 Analyzed detection ratios and antivirus engine results
- 4 Observed behavioral indicators (network, file, process activity)
- 5 Understood malware lifecycle stages
- 6 Reviewed common malware propagation methods
- 7 Identified practical malware prevention techniques
- 8 Summarized findings in a classification report
